
Table of Contents

	Page No.
1. Executive Summary	1
2. Introduction	4
3. Methodology.....	6
3.1 Mapping and Travel Time Data	6
3.2 Pavement Roughness	8
4. The CCMPO Linear Referencing System	9
5. Evaluation of Congestion	20
5.1 Travel Speeds	20
5.2 Congestion Index.....	24
6. Roadway Pavement Assessment.....	38
7. Conclusions.....	41

List of Tables

	Page No.
Table E1 – Top 20 Worst Segments By Congestion Index in 2010	3
Table 1 – Congestion Index Criteria.....	8
Table 2 – Summary of Congestion Index for 2010.....	24
Table 3 – Top 10 Segments With Largest Drop in Performance Relative to 2006	30
Table 4 – Top 10 Segments With Largest Improvement in Performance Relative to 2006	31
Table 5 – Top 20 Worst Segments By Congestion Index in 2010	32
Table 6 – Total Study Run Miles by Area Type and Facility Type.....	36
Table 7 – Total Congested Miles by Area Type and Facility Type	37
Table 8 – Worst 5% of Route segments for Pavement Roughness.....	38

List of Figures

	Page No.
Figure 1 – Fall 2010 Study Limits.....	5
Figure 2 – Intersections Controls	10
Figure 3 – Posted Speed Limits	11
Figure 4 – School Zones	12
Figure 5 – Number of Lanes	13
Figure 6 – Median Type	14
Figure 7 – Bike Lanes	15
Figure 8 – Construction Zones.....	16
Figure 9 – Jurisdictions	17
Figure 10 – Model Area Type.....	18
Figure 11 – Model Facility Type	19
Figure 12 – AM Average Speed.....	21
Figure 13 – Mid-day Average Speed.....	22
Figure 14 – PM Average Speed.....	23
Figure 15 – AM Congestion Index.....	25
Figure 16 – Mid-day Congestion Index	26
Figure 17 – PM Congestion Index.....	27
Figure 18 – AM Percent Change In Congestion Index From 2006.....	28
Figure 19 – PM Percent Change In Congestion Index From 2006.....	29
Figure 20 – Congestion Index during AM on 0.1 Mile Segments	34
Figure 21 – Congestion Index during PM on 0.1 Mile Segments	35
Figure 22 – Pavement Roughness.....	39
Figure 23 – Example Pavement Roughness Profiles.....	40
